

PRM-W3 Electronic Board

Improved substitute for industry standard **savitec** 300W

Preliminary Data Sheet

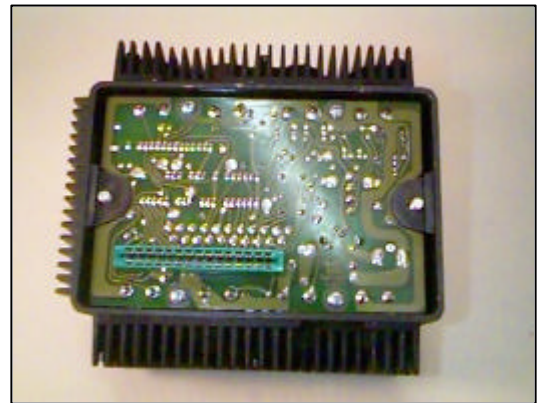

- Electronic control board pin to pin compatible with original electronic **savitec** board
- **Low cost: US \$ 102.-** (price for guidance)

Existing Features

Control board for bi-phase AC motor
Speed adjustment by frequency and voltage modulation
PWM systems
Board supply voltage: 48 V/DC

New Features

- Microcontroller control logic
- New high performance automatic speed adjusting algorithm
- Cooler working temperature
- Microcontroller improved optical yarn reader sensing
- MOS power drivers
- Special programming features on demand

Two switch selected programs:

Program 1 as original electronic **savitec** B board, with the same features of the original control.
Program 2 with new improved features: program 2 features may also be adapted to specific needs on demand.

PRM-W3 electronic control board is pin to pin compatible with the original savitec 300W electronic boards.

You just have to change the full old (broken) electronic board with a PRM-W3 new one.
